Event Hazards

Hazard Identification & Management - include significant hazards only

Eliminate [E] by ensuring that the hazard no longer exists, or is no longer part of the activity;

Minimise [M] by doing whatever can reasonably be done to lessen the hazard, this should be to a point where you no longer consider the hazard to be significant.

cant Hazard	[E] [M]	Management Strategies	Whose Responsibility
1. Uneven ground, rooty and rocky ground, steep ground, unstable ground.	М	Map checked for quality and consistency of mapping, with all hazardous terrain features identified and accurate.	Controller
2. Cliffs/banks, pits, tomos, and trenches present.		Courses designed to illuminate hazards where possible in relation to the skill level of competitors.	Planner
und cover including; ndergrowth, and tree	М	Competitors notified of terrain hazards in event information.	Coordinator
n could be slippery and/or	М	Signage and tape used as appropriate in event area on day.	Controller
nstable when wet or rotten.	М	Get up-to-date site information from landowners.	Coordinator
lision with trees, and/or	М	Vegetation 'runability' and fences identified on map.	Coordinator
spiky branches. 5. Hazardous plants present. 6. Fences that are unstable, and hard to see. 7. Flooded and deep waterways 8. Wasps present. 9. Natural disasters; fire, earthquake, tsunami.	М	Competitors advised to consider eye protection.	Coordinator
	М	Hazardous plants made known to competitors.	Coordinator
	E	Plan courses to avoid flooded waterways and/or provide compulsory safe crossing places.	Planner
	М	Known wasp nests marked on the maps and taped off. Courses designed to avoid them. Some areas should not be used at some times of year.	Controller
	М	Display Emergency Procedure Notice, describing evacuation process.	Coordinator
	М	Hard to see fences marked on map, and taped to enhance visibility in the field.	Controller
axis,	. sprains, falls, grazes, ab		M Hard to see fences marked on map, and taped to enhance visibility in the field. sprains, falls, grazes, abrasions, eye danger, and other injuries including serious harm. Drowning.

FIRE, EARTHQUAKE, NATURAL DISASTER

Note the following needs to be flexible and common sense should prevail depending on the situation.

- 1. On notification of a fire threat or situation putting participants' safety seriously at risk, the Controller assumes command role.
- 2. Ensure everyone is removed from immediate danger.
- 3. In an emergency dial 111 if this has not already been done.
- 4. Determine a safe assembly point and exit route as soon as possible (upwind from any fire).
- 5. Activate warning system by having cars, bikers or runners moving along safe roads and tracks continuously sounding car horns or air horns. They can collect participants en route and return them to the event centre of safe assembly point.
- 6. Exit Route should be determined according to the circumstances on the day, with signage if necessary.
- 7. Controller should ensure everyone accounted for and someone signs off participants as they leave.
